

Cougar Arbor Access Line

Polyester Double Braid - 24 carrier plaited jacket over plaited core

FEATURES

- Hard wearing HT Polyester double braid
- Heat Set for maximum repeatable performance from the first deployment
- At 11.7mm, provides perfect balance between comfortable grip and light weight performance
- Super low stretch climbing line well favoured by climbers on rope wrenches and unicenders for single line access and work positioning
- Double braid construction gives flexibility for easy splicing
- Will not milk when used with prusiks and traditional hitches
- ANSI-Z133

RANGE/TECHNICAL

- 11.7m
